

Our two most popular Dot Dash finishes!

Dot Dash Signage continues to be the standard of excellence in the industry and has been one of the leading office cubical signs over the past fifteen years. Our two most popular finishes, ***Simulated Glass*** and ***Soft Frost*** are translucent and fit into any environment. Both finishes have a fine matte surface that is very durable, doesn't show fingerprints and if necessary, can be easily cleaned with hand soap and water or any glass cleaning product. The rounded edges are polished for a detailed, finished look.

Dot Dash Signage consists of a Dot plaque holder, the message plaque and plastic or metal brackets off the back side of the Dot that fit into/onto most popular cubical panel systems. The Dot holder can be rotated 180 degrees to show the plaque above or below the panel height.

The two Dot Dash plaque finishes shown are reusable and can be re-lettered either by Appenx or a local sign shop.
